#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Drawings*

The drawings are objected to because an isometric view would allow one to quickly ascertain the subject matter of the claimed invention.

### ***Claim Rejections - 35 USC § 112***

Claim 1 and its dependent claims are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "the interface" lacks a proper antecedent.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Bresin.

As to claim 1, Bresin shows a plastic cylinder 6 with a plurality of ridges at 10 formed on the outer surface. With respect to claims 2 and 3, fig. 3 shows where there is at least 3 ridges spaced at least 120 degrees. For the purposes of interpretation of the claim, the "third ridge" is larger at 6 and the first and second ridges are at 10 o'clock and 2 o'clock about the circumference of the cylinder.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bresin in view of Arutunian '209.

To have provided a flat surface at 8 as shown in fig. 3 of Bresin would have been obvious in order to provide a firm finger grip as taught by '209.

Art Unit: 3711

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haza, Hausman, Bernhardt and Lakusiewicz show finger grips.
